

## SUMMARY

**Dynamic Full Stack Developer** specializing in Angular, NestJS, and the MERN stack (MongoDB, Express.js, React, Node.js). Expert in designing RESTful APIs and enhancing user experiences, with strong problem-solving abilities. Adept at collaborating with cross-functional teams to deliver scalable applications and implementing CI/CD pipelines for efficient deployment.

## SKILLS

- HTML
- CSS
- Bootstrap
- JavaScript
- React
- Express
- MongoDB
- SQL
- No-SQL
- Node.js
- Angular
- TypeScript
- NestJS
- MySQL
- Time management
- Problem solving
- Code reviews
- Database architecture
- RESTful services
- Requirements gathering
- Technical analysis
- Git version control
- CI/CD pipelines

## EXPERIENCE

**Full Stack Developer** / Impelox Tech Private Limited - Chennai, Tamil Nadu

06/2024 - 10/2025

Developed and maintained insurance-based web applications (Car Insurance, Group Insurance) using Angular, NestJS, and TypeScript.

Designed and integrated RESTful APIs to support policy creation, quote generation, and distributor onboarding. Built responsive, user-friendly UI components in Angular, improving the customer experience in purchasing insurance products.

Collaborated with cross-functional teams to deliver scalable, secure, and high-performance applications.

Implemented a product flow where insurers create products, assign them to distributors, and distributors generate quotes and sell policies to customers.

Developed functionality for commission tracking, enabling distributors to earn commissions based on policy sales.

Gained working knowledge of CI/CD pipelines for automated deployment and delivery.

Utilized Redis for seamless communication and caching in distributed systems.

Participated in code reviews, database architecture discussions, and contributed to application scalability.

Collaborated with the team on project management and time management practices.

Used Jira for task tracking and agile workflows.

Acquired basic knowledge of AWS cloud services for application hosting and deployment.

## EDUCATION

**Bachelor of Commerce**

01/2022

Annamalai University - chidambaram

**High school or equivalent**

01/2013

Govt.HR.Secondary school - Thirubuvanam

## CERTIFICATIONS

- Certification in Full Stack Development - [Guvi](#)
- Certification in JavaScript - [Guvi](#) (11/05/23)

## PROJECTS

**Gmail Clone**

Built a robust e-commerce platform with MERN stack, featuring a userfriendly React front-end for seamless navigation. Implemented a dynamic product catalog, empowering users with intuitive browsing, search, and filtering options. Crafted an engaging shopping experience through responsive design and thoughtful UI implementation.

**E-commerce Platform**

Built a robust e-commerce platform with MERN stack, featuring a userfriendly React front-end for seamless navigation. Implemented a dynamic product catalog, empowering users with intuitive browsing, search, and filtering options. Crafted an engaging shopping experience through responsive design and thoughtful UI implementation.

**Web Scraping Application**

Developed a web scraping application using Node.js and Puppeteer to extract data from websites. Implemented automated data retrieval, processing, and storage for efficient information gathering. Utilized Cheerio for HTML parsing and manipulation. Ensured compliance with ethical scraping practices and website terms of service. Deployed the application on cloud platforms for seamless and scalable execution.

**Real Time chat App**

Created using Socket.io with instant messaging, authentication, and dynamic chat rooms. Built a scalable, real-time communication platform with smooth user interaction, ensuring reliable connectivity and seamless collaboration.
